Professional Summary

B.Tech Computer Science Engineering student with hands-on experience in full-stack development and DevOps. Proficient in the MERN stack, REST APIs, and AWS, with experience deploying scalable applications using Docker and Kubernetes. Passionate about cloud engineering, automation, and system reliability.

Education

Techno India NJR Institute of Technology, Udaipur Rajasthan, India

B.Tech in Computer Science Engineering

Aug 2022 – Present

Current CGPA: 8.3/10

Experience

Intern, NASSCOM ML Internship – Udaipur Rajasthan June 2024

Sept 2024

Analyzed real-world datasets and developed basic machine learning models using Python, contributing to classification and regression pipelines within a collaborative team environment.

Projects

Revuzen AI | Autonomous GitHub PR Review Agent

- Built the React dashboard and Node.js/Express backend for an autonomous PR review agent — GitHub webhook → AI analysis → git push with zero human intervention across 4 microservices.
- Secured the pipeline with HMAC SHA256 webhook validation, Redis-backed OTP auth, and an MCP tool layer guarding against path traversal attacks.
- Skills Node.js, Express, Prisma, React, Socket.IO, Redis, Docker

Chapter Exchange | E-commerce Platform

- Designed and developed Chapter Exchange, an online marketplace for users to buy, sell, and exchange used books.
- Built a user-friendly platform with features such as book listing, search and filtering, user authentication, shopping cart, and order management.
- Implemented a secure payment gateway for seamless transactions and integrated user reviews and ratings to build trust among users.
- Skills: React.js, Node.js, Express.js, and MongoDB.

MERN App Deployment on Kubernetes

- Developed and containerized a MERN-based web app for scalable deployment.
- Deployed on AWS EC2 with Kubernetes for high availability and load balancing.
- Implemented persistent volume storage in MongoDB to ensure data durability and consistency.
- Skills: MERN, Docker, Kubernetes, AWS

CERTIFICATIONS & ACHIEVEMENTS

- DevOps Training: Learned CI/CD concepts, Git, Docker, Kubernetes basics, Linux administration, and AWS fundamentals
- Full Stack Developer Certification – Grras Solutions. (Trained in MERN stack and RESTful API development)

Skills

Languages & Frameworks: C, C++, HTML, CSS, Express.js, MongoDB, Node.js, Python, SQL

DevOps & Tools: Docker, Kubernetes, GitHub Actions, CI/CD

Web & API Development: REST APIs, JSON, Postman

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Load Balancer)

Operating System: Linux (Package Management, User Management, Process Management, Job Scheduling, Disk Management, File Systems, Networking, Domain Name System, Service Management)
